Work Plan & Projects as of 11/3/2023

- ✓ Data complete. Posted on OCHPP website or ready for review/sharing. Data reflects most up-to-date data available from sources
- ✓ Data in process
- ▪ Request for data is under review
- ❖ Data on hold

Note: We update the work plan on a regular basis as priorities change or data becomes available.

Indicator and year of most recent updated data	Deliverable item	Notes
Hospital Admissions **(CIHI/hospital data up to November 2022 – in progress)** **(Last data: 2015/17)**	✓ All Hospital Admissions ✓ Prenatal, Delivery and Postnatal Conditions ✓ Alternate Level of Care Days ✓ Readmissions + Readmissions 65+ ✓ Medical ✓ Surgical ✓ ACSC admissions ✓ Mental Health (MH) Hospital Admissions ✓ MH hospital admissions only6/23/2022 ✓ Addiction-related hospital admissions only	*October 31, 2023: Due to requests by partners, hospitalizations data next in queue after adult health & disease (chronic disease) data. New local areas now finalized.* *August 1, 2023: Due to issues with changes in boundaries for some local areas, the creation of all new local areas for another large entity, and a decision to re-run all of our area population files, time-line is now Fall 2023 for hospitalization indicators.* *May 23, 2023: Time-line still end of May 2023 for the first-round of this data. Then for review and sign off on risk de-identification, Then posting. Maps follow. Final data posting-mid June 2023.* *April 6/, 2023: Time line is end of May for these indicators to be posted on OCHPP.* *~~Time line is end of March for all indicators for Toronto, LHINs & SR (only), checking and posting. Other geographies to follow.~~* *February 7, 2023: These indictors will be posted on OCHPP by mid-March. Decided to use RPDB 2022. RPDB 2022 in progress/review. Then hospital admissions data will be generated using new RPDB. Some exceptions for some geographies for posting on OCHPP will be implemented.* *December 19, 2022: In progress using RPDB 2019 for partners needing data. Received data from ICES as an urgent request for all hospital admissions. Focus for this update is AHA and ACSC. Ready by January 2023 using RPDB 2019.* *Will switch to updated RPDB and re-run all indicators for all neighbourhood. Completion February 1 2023.* *December 19, 2022: Finalizing Level 1 access.* *~~September 19, 2022~~: Nov 7, 2022 (Still) working on continued Level 1 access for OCHPP data analyst for hospital admissions data. Once finalized, OCHPP analyst will generate all indicators for hospital admissions. Will include: Peel Health Data Zones & Ottawa neighbourhoods.* *Note 1: Ottawa nbhoods subject to methods agreed-on for threshold reporting. Stratification may now be possible but not for all nbhoods.* *Note 2: Team decided to update RPDB to 2022. Will use updated RPBD for denominator for hospital admissions and all other OCHPP indicators as of update of RPDB.*

OCHPP

A partnership designed to facilitate access to information for health planning
with the overall goal of producing action to reduce health inequalities.

		August 3 2022: ICES analyst is needed to generate hospital admissions data. New DCP required with all steps required for data analyst to generate hospital indicator data for all variables. AMT & Mohammad will work to create a detailed DCP. Submit to ICES, assign an analyst to generate the outputs then Mohammad generate his analysis. *Updated hospitalizations data to include Ottawa nbhoods and Peel Health Data Zones; include MH hospitalizations & addictions-related hospitalizations as separate indicators. Readmissions data was generated previously but not posted; revisit this indicator again when we generate next cut of hospitalizations data. For Ottawa, agreement for data is for total population by nbhood – no stratification.* *See updated note, above. ~~Aug 3: Keep RPDB 2019 for hospitalization then when we re-run previous indicators, update RPDB to 2021.~~* *Notes:* *Conversion file almost complete which now includes PHDZs. Hold off on posting conversion file to OCHPP public site until after we generate next indicator (all hospital admissions) as per Peel's request.* *In progress –update of OCHPP Conversion File to add PHDZs – mid-summer 2022 (see section below, Misc) – then ensure hospital indicators are also run for PHDZs*
Emergency Department Visits (EDV) **Latest data will be up to:** **(2018/20) and 2019/21 (Ottawa)**	✓ All EDV ✓ High Urgency EDV ✓ Low Urgency EDV ✓ EDV that are MH and Addiction-Related ✓ Separate MH from Addictions-related EDV ▪ EDV Best Managed Elsewhere ❖ *First Contact EDV for MH* ❖ *Repeat Visits for MHA*	*October 31, 2023: Same note as for hospitalizations data, above. EDV in queue after chronic disease and hospitalizations. Early winter 2024.* *August 1, 2023: Late Fall 2023* *May 23, 2023: end of June 2023.* *March 21, 2023: End of April time-line* *February 7, 2023: See note above for hospital indicators. .EDV coming after hospitalizations using RPDB 2022. End of March 2023.* *December 19, 2022: Separate MH & Addictions-Related Visits: Data being checked. .* *November 7, 2022: Data for MHEDV posted for Ottawa neighbourhoods on OCHPP including updated About the Data document and other information on the OCHPP site to include details about Ottawa e.g. geographic boundaries and maps section of OCHPP.* *September 19, 2022: Still checking the data checking macro process. Will send data for checking to Rick once checks are complete. May need to re-run Ottawa data based on latest decisions on threshold for reporting.* *August 3, 2022: Generate MHEDV for addictions and non-addictions related MHEDV for Interim Regions. Do a check of all the data for small cells, suppression? Send to Rick for review by August 20 2022.* *Decision re Ottawa nbhoods: Generate data for Ottawa for crude rates only i.e. not stratified by sex (gender) or age. Provide raw data only for Ottawa.Will work on generating this data for Ottawa now that decision is made to generate by total population by nbhood.* *June 22, 2022: All EDV data updated for all geographies except Ottawa. MH & Addictions as separate indicators in in progress for all geographies* *Next update early July 2022:* Generate All MHEDV for Ottawa Neighbourhoods. *Note:* OCHPP will provide ONS with: MHEDV 20+, M&F combined & both (would not stratify by age groups or sex) in order to deal with the issue of small cells. *Late summer 2022:* Provide separate MH and separate addictions-related EDV for all geographies as small cells allow. May need to combine ages for smaller areas such as Ottawa and other non-Toronto neighbourhoods. Combining many years of data is not recommended. Include PHDZs as

		part of the data cut if we're ready with conversion file. *Notes:* Data not posted for EDV Best Managed Elsewhere as this indicator has some complexity not easily understood by the data;First Contact/Repeat Visits: Part of on-going Ontario Health Toronto Region (currently TCLHIN) analytics project.
Census (2021) Population and Socio-Demographic Variables	Census 2021 Variables planned for release: ✓ Population, 2021 (Total, Age 65+, Age 85+) ✓ Total - Occupied private dwellings by structural type of dwelling ✓ Total - Private households by household size (1 Person Households) ✓ Total - Persons in private households (Lone-Parents, Persons Living Alone, Children) ✓ Total - LIM low-income status in 2020 for the population in private households ✓ Total - LICO low-income status in 2020 for the population in private households ✓ Total - Knowledge of official languages for the total population excluding institutional residents ✓ Total - Private households by housing suitability ✓ Total - Immigrant status and period of immigration for the population in private households ✓ Total - Generation status for the population in private households ✓ Total - Visible minority for the population in private households	*2021 data: Asked GM for an update.* *October 31, 2023: Census variables created for all Ontario geographies. Data and maps posted for Toronto & OH Central Region with more to come. Census data for all other areas require formatting then can be posted on OCHPP. Target date for posting: mid-December 2023.* *August 1, 2023: Fall 2021 for remaining Ontario geographies.* *Census data for Toronto posted. Data for all other local geographies in progress.* *Special request to StatsCan for Francophone data – awaiting arrival of this dataset* *May 23, 2023: Maps & data for multiple variables posted. More maps & data in progress (see website)* *Apr 6/23: Final 3 variables under review. To RG by April 14/23 for checking and sign-off.* *March 21, 2023: Seven variables posted on OCHPP.* *Final 3 variables being checked. Data tables to be posted estimated end of March/23. Including maps.* *February 7, 2023: Census data in progress. 7 variables for Toronto generated and ready to be posted on OCHPP. More variables coming. Custom request also being organized for specialized Census variables. Census data to be provided for all LHINs, Sub-Regions, Small Areas/Neighbourhoods *(with some exceptions).* *December 19, 2022: Many Census variables complete for Interim Health Regions. Checking in progress. Next checking is for all other geographies. Priority for December 23, 2022 is for Toronto neigbhourhoods. All other Ontario geographies to be complete and posted by mid-January 2023. Census data variables generated to date (being checked):* *December 19, 2022: Data ready and in checking for Ont Health Interim Regions as of: Pop counts, Dwelling characteristics, Household size, Persons in private households, LICO-AT, Knowledge of official languages, Housing suitability, Immigration status, Generation status, Visible minority,* *November 7, 2022: Discussions underway about updates to Census population and socio-demographic variables using Census 2021.* *Urgent request of some of the variables required for the Novo Nordisk team for neighbourhoods in Peel Region. Discussions re time-line and which variables to be generated right away in progress.September 19, 2022: Census 2021 population counts by age & sex by Ontario neighbourhoods and other OCHPP geographies to be posted in January 2023. Review what's available via other sources such as CDP then determine if we want to submit a custom request.* *Next update (approximate): (November 7, 2022: See note above)* November 2022 is when 2021 Census data becomes available; OCHPP to determine a custom cut for current indicators + new ones. Liaise with Mathematical Modeling Team at MAP for sharing of some Census data?
Census (2016) Population and Socio-Demographic Variables	Census-based population denominators 2016 ✓ Visible Minority, Mobility Status, Immigrant Status, Employment, Housing Suitability, Education, Income , 2016 ✓ Population in private households: Seniors (60+ Living alone & Activities of Daily Living, 2016 ✓ Language Most Often Spoken At Home, 2016 ✓ Top 5 Languages Spoken At Home, 2016	

	✓ Lone Parent Families, 2016 ✓ Other indicators upon request, 2016	
2023 Population Denominators using Registered Persons Database (RPDB) **2019 & 2016 Population Denominators using Registered Persons Database (RPDB)**	✓ RPDB 2023 ✓ RPDB ~~2022~~ ✓ Registered Persons Database Denominators (2019 & 2016)	*October 31, 2023: Population denominators RPDB 2023 are complete and posted on OCHPP for all geographies. Exception: Ottawa is now being completed due to a boundary change. RPDB for Ottawa to be posted by Nov 8/23.* *August 1, 2023: OCHPP team decided to update all population denominators to 2023. We had started to generate RPDB earlier in the year and as we got further along in the year, we decided to update everything to March 31/23. To be completed by August 11/23.* *May 23, 2023: RPDB 2022 complete with exception of Ottawa nbhoods & 6 Health Boundaries. .* *Apr 6/23: Adding OHCentral & OttGen3 to RPDB 2022.* *April 6, 2023: Ontario Health Central and Ottawa Gen3 nbhoods being added to RPDB files. Waiting on Ottawa for some questions re their new nbhoods. Completion target: April 14/23.* *March 21, 2023: Toronto pop denominators (RPDB) reviewed and posted on OCHPP and shared with OHToronto. All other geographies except Ottawa in review then for posting on OCHPPP by Mar 30/23.* *February 7, 2023: RPDB denominators in process/checking for all geographies.* *December 19, 2022: Update RPDB 2022 ASAP for use in 2023.* *November 7, 2022: Decision to wait for 2022 RPDB until after all hospital admissions indicator is generated then update RPDB.* *September 19, 2022: OCHPP agreed to update RPDB to 2022 and to use RPDB for indicators.* *OCHPP data analyst to submit a data creation plan to ICES to assign an ICES analyst to generate the population counts for Ontario from RPDB and to provide final counts after postal-code conversion file process.* *August 3, 2022:* *See revised note, above. ~~Next update: After we complete hospitalization indicators then start to use RPDB 2021 (instead of 2019)~~* *In discussion re date to switch to RPDB 2022.* *Notes: Need to note differences in 2016 & 2019 & 2021?*
Primary Care/Health Care Use, Needs & Gaps in Care (2015/16) – Special Project Commissioned by Toronto Central LHIN (now Ontario Health Toronto)	✓ Health Care Needs (Mental Health Disorders, CBI Clients, LIM/SAMI) ✓ Health Care Use (Specialist visits, EDV, ACSC) ✓ Primary Care Physicians In Any Model	*As of Oct 31/23: Next update:* No current plans for update at this time. This project is complete. Notes: Gaps in Care project was a special data project requested by our Toronto Central Local Health Integration Network. The data and maps are provided in a Chartbook published by ICES and available online at: ICES website: https://www.ices.on.ca/Publications/Atlases-and-Reports/2018/Geographic-Variation-in-Primary-Care
Ontario Marginalization 2021	Note new names effective with release of ON-Marg 2021:	*October 31, 2023: ON-Marg 2021 tables, user guide, FAQs posted on OCHPP. ON-Marg data and maps for Toronto and OH Central Regions posted on OCHPP. Slight change in boundaries for Toronto ON-Marg maps underway i.e. removing LHIN boundaries for TO and replacing with SR*

with the overall goal of producing action to reduce health inequalities.

Ontario Marginalization Index (2016)	✓ Households and dwellings (previous called 'residential instability') ✓ Material resources (previously called 'material deprivation') ✓ Age and labour force (previously called 'dependency') ✓ Racialized and newcomer populations (previously called 'ethnic concentration') ✓ Material Deprivation* ✓ Residential Instability* ✓ Dependency* ✓ Ethnic Concentration* *See new names for these dimensions*	*boundaries. Maps to be redone and new maps posted on OCHPP by week of Nov 6/23.* *August 1, 2023: ON-Marg 2021 launched on OCHPP. Data table, user guide, FAQs posted on OCHPP.* *ON-Marg maps and data for Toronto nbhoods complete and posted on OCHPP. ON-Marg maps for OH Central in progress (to be posted by mid-August). Other Ontario geographies in progress – time-line end of August 2023.* *May 23, 2023: Community –engagement survey results received and tabulated. Decision to rename dimensions to new names finalized based on input from community. Release date for ON-Marg end of May 2023. OCHPP team working on creating ON-Marg for Ontario geographies but user guide will assist users with how to "roll-up" small areas to other geographies as necessary.* *April 6, 2023: Community engagement survey sent to expert stakeholders. Deadline for return of final survey responses is April 13/23. Compile responses then determine final dimension names. ON-Marg 2021 release expected mid-summer 2023.* *March 21, 2023: Community engagement survey to review new dimension names in progress while ON-Marg Index Ver 2021 analysis on-going/ progress. Release date scheduled for late Spring 2023.* *December 19, 2022: Same note as November. Discussions underway to rename dimensions. Suggested list of persons who can provide input has been circulated. Planned release Spring 2023.* *November 7 2022: ON-Marg 2021 update still expected for sometime in 2023: In discussions with PHO to update ON-Marg 2016 to ON-Marg 2021 using latest Census data and rename some of the dimensions.* 2016 ON-Marg, user guide and tables available on OCHPP website: http://www.ontariohealthprofiles.ca/onmargON.php#onmPHOdata2016
Adult Health and Disease (2018/19) **Diabetes 2020 data provided to Peel region on December 12, 2022.**	✓ AHD all indicators asthma, diabetes, COPD, HBP, Mental Health Visits to a primary care provider; ✓ 4+ and 2+ multiple chronic conditions (4+ using HL definition/2+ using ICES definition) ▪ Arthritis & dementia	*October 31, 2023: Moved Adult Health and Disease (chronic disease) indicators up the data queue. Asthma data generated and undergoing review. Next indicators as per request from OH Toronto Region: COPD, CHF (can we generate this?), HPB, Diabetes, MHA visits for visits to a primary care provider. Most data to be completed and posted on OCHPP by Dec 2023. Others e.g. MHA, 2+ and 4+ in early 2024.* *August 1, 2023: Fall 2023. After all hospital admissions.* *May 23, 2023: July 2023. Decision to generate AHD before EDV. In queue after hospital admissions. July 2023.* *February 7, 2023: AHD is in queue for updating. April 2023.* *Awaiting ICES approval/amendment for use of PHDZs. Discussion required about posting PHDZ data on OCHPP until OH Central nbhoods are resolved.* *December 19, 2022: Diabetes data and maps provided for Peel on December 12, 2022. Select Census variables by PHDZs also provided to Peel on December 12, 2022. Data will be posted on OCHPP in January 2023 (after agreement with Peel and approval of ICES PIA).*

		Request for diabetes data by CT by Peel. Will generate CT-level data in January 2023.
		December 19, 2022: Updated adult health and disease for all Ontario geographies will resume in 2023.
		November 7, 2022: Urgent request in progress for diabetes data for Peel Health Data Zones in progress. Submitting a data creation plan (DCP) to ICES to have an ICES analyst generate ODD data for Mohammad (given Mohammad's data access is still not in place yet). Mohammad requires a Level 3 dataset from ODD data with DOB removed from ODD (just include age) and removal of postal code from the ODD dataset (run postal code through PPCF+ then assign DA.
		Next update (approximate) of all indicators: Current data complete/update 2023. Use updated RPDB when we re-generate this data again.
		Notes: Sample sizes too small to report dementia and/arthritis for the year of data we reported as these are new ICES registries and data not available in larger samples yet. We did not report arthritis or dementia in this latest round of AHD data.
Children and Youth (2014/15)	❖ Asthma ❖ Mental Health and Addiction-related ❖ Emergency Department (ED) visits ❖ Injuries All Admissions and ED visits	*October 31, 2023: Decide on this indicator with partners.* *February 7, 2023* *Next update (approximate): TBD or upon expedited request.*
Prevention (Cancer Screening) (2018/20)	✓ Mammograms ✓ Pap smears ✓ Any Colorectal Cancer Screening ✓ Colonoscopy ✓ Fecal Occult Blood Testing ✓ FIT	*October 31, 2023: Moving down queue after chronic disease, hospital admissions and EDV. Feb-Mar 2024.* *August 1, 2023: In queue for late Fall 2023 for all geographies. Include FIT instead of FOBT.* *May 23, 2023: In queue for Fall 2023 for all geographies for pap smears, mammograms. Still checking code for new FIT (vs FOBT) at ICES to see if code in place for generating data for colorectal screening.* *April 6, 2023: Pap smear data completed for Ottawa Gen2 nbhoods. Under review. April 13 timeline for checks and send to RG for sign-off.* *March 21, 2023: Mammogram and pap smear maps posted on OCHPP for all nbhood geographies except Ottawa.* *March 21, 2023: Pap smear data re-generated for Ottawa nbhoods (GEN2). Checking underway. To be posted end of March/23.* *February 7, 2023: Mammogram and Pap smears maps to be posted on OCHPP for local areas and larger geogrpahies. Posting date imminent.* *August 3, 2022: Removed pap smear data for Ottawa neighbourhoods from OCHPP website. Upon review of data, OCHPP team, in consultation with Ottawa, agreed, the results were mis-leading due to the methods involved in attaching individuals to nbhoods using Ottawa methods. Cannot supply Ottawa with any data where age or sex may be needed like pap smears due to methodological issues using Ottawa's neighbourhood weighting file.* Updated data complete for Mammograms and Pap Smears using most up-to-date data. Colorectal screening on hold due to change between FOBT to FIT. Waiting on codes to run the CRC data Notes: FY 18-19 work plan*See notes below re this indicator

with the overall goal of producing action to reduce health inequalities.

Premature Mortality (2013/16) **Leading Cause of Premature Mortality (2011/16)**	▪ Death <75 yrs of age ▪ Leading causes of death <75 yrs of age	*October 31, 2023: No change in plans.* *August 1, 2023: No change in plans.* *February 7, 2023: Same note as December 19, 2022.* *December 19, 2022: Data won't be posted until mid-2023. Too many other competing requests for data and waiting for the update of RPDB.* *Next update – approximately Late Fall 2022* Previous notes: Oct 11: Comparison/linkage done using ORG at ICES. Data is sound. Generating FY 2013, 2014, 2015 all geographies by FY for premature mortality. Using 2014 RPDB as denominator. Leading causes of death (top 5) also being generated for FY 2011, 2012, 2013, 2014 & 2015 all geographies. Use 2013 RPDB. Linking Ontario Registrar General data to RPDB. In progress.
Mothers and Babies	▪	*Next update: TBD or upon expedited request by partners*
Sexual Health	▪	*Next update: TBD or upon expedited request by partners*
Palliative Care	▪	*Next update: TBD or upon expedited request by partners*
Injuries	▪	*Next update: TBD or upon expedited request by partners*
Primary Care	✓ Attached, Uncertainly Attached ✓ Other variables in process for PC attachment (unattached & uncertainly attached by various indicators including PEMs) ✓ Inter-Professional Team Care ✓ Virtual Care Visits during COVID-19 *NEW* ✓ 7 Day Follow Up with a Primary Care Physician Upon Discharge from Hospital	*October 31, 2023: PC attachment maps for 2022 generated for all geographies. Data tables for OH TR N158 and OH Central also complete.* *Ottawa nbhoods to be posted on OCHPP week of October 30 or week of Nov 6* *Maps can be posted on OCHPP but data tables for TR and OHC need checking.* *August 1, 2023: New primary care attachment data generated and ready for mapping for all geographies for attached, unattached & uncertainly attached. To be posted throughout August 2023.* *May 23, 2023: In queue end of summer 2023.* *March 21, 2023: Attachment data to be generated for Ottawa using GEN3 nbhoods. Process of checking underway.* *Decision to generate PC attachment data for all Ontario geographies once updated dataset available from ICES.* *Other indicators (indicated in red checks), for Toronto still being checked.* *February 7, 2023: Data requested by Ottawa for Attached, UnCertainly Attached. Counts only using new ONS conversion file.* *December 19, 2022: Checking of other PC attachment variables for Toronto neighbourhoods and Ontario sub-regions in progress.* *November 7, 2022: Shared 4 newly created maps for Primary Care: Attached, Uncertainly Attached with OH Toronto team. Finish About the Data document then post maps on OCHPP. Decision is to publish Toronto and sub-region data. Checking of other data/variables for Toronto and sub-regions still in progress/* *September 23, 2022: Shared primary care attached, uncertainly attached data table for Toronto neighbourhoods with OH Toronto team with caveat that data might change once we do our checks of the other variables including sub-regions. PI agreed to share data table as no small cells. Maps in progress. Other variables checking in progress.* *September 19, 2022: GIS/Data specialist is checking data. Then to PI for review. Issues with small cells and back-calculations. TBD if OCHPP provides neighbourhoods and sub-regions or just neighoburhoods.* **Aim is for mid-October for release of data to partners and posting on OCHPP.**

OCHPP
Ontario Community
Health Profiles Partnership

A partnership designed to facilitate access to information for health planning
with the overall goal of producing action to reduce health inequalities.

		August 3, 2022: Final tables for primary care unattached data in review. See notes below. After checking, we have now concluded that the differences in population between OCHPP's own RPDB2019 file and the OHT/Attributed Population file shared by the Inspire project at Queens are a result of differences in methodology used to generate the denominator files. So while there may appear to be people "missing" from the primary care tables that are reported in the OCHPP RPDB2019 Excel file, this is due to the methods used to define the denominator. However, the resulting tables are both valid for Toronto. Therefore, for consistency in reporting primary care attachment (and in the interest of simplicity and time), we will use the raw data from the OHT primary care population (PCPOP) file from ICES Queens to tabulate the Toronto attachment data for this project - we have returned to our review and checking of the tables we had already generated in June (for the primary care variables – many requested by OH Toronto), for Toronto 140 neighbourhoods and Ontario sub-regions) and are nearing completion of their validation. We will provide notes in the final primary care tables explaining the difference in the population counts when compared to the OCHPP RPDB2019 data as well as methods employed to generate the analysis. *June 2022: Need to re-run primary care attachment data using PCPOP as denominator. Waiting for permission to use PCPOP (Jun 30/22) IPT, VC,* *7-Day Follow Up: Review these 3 variables (IPT, VC Visits, 7-Day F/U) – not sure where we're at with this review?*
New Geographies & Conversion File	✓ Update of OCHPP conversion file	*October 31, 2023: Conversion file Ver16b Oct version now in place for OCHPP internal use. File includes TRCA ADAs. Public version to be posted tbd. Version still relies on 2016 Census geographies.* *August 1, 2023: Conversion file once again in process due to changes in boundaries for some small areas. Revisions in progress. Public version of file to be posted on OCHPP when all areas have been checked and finalized. Conversion file will still be using 2016 DAs. OCHPP team to use: RPDB 2023, PCCF+ 2016 & Conversion file (for health indicators), 2016.* *Sub-conversion file for Census will use 2021 DAs.*
	✓ Completed review of Ottawa neighbourhoods and agreed-on methods for reporting Ottawa neighbourhood data.	*October 31, 2023: Final version of Ottawa nbhoods arrived at! Moved a DA into another nbhood. Updated the OCHPP conversion file to reflect the change. Data and maps can now be generated for Ottawa based on decisions for Gen 3 final nbhoods.* *August 1, 2023: Still finalizing Ottawa local areas – resolution required re nbhoods with small data counts. To be resolved week of July 31.* *May 23, 2023: Conversion file completed for OCHPP internal use.* *April 6, 2023: Still in progress. Adding new 200+ OH Central nbhoods + Ottawa Gen3 nbhoods. Expected completion: April 7/23.* *March 21, 2023: Lengthy conversion file process underway. All conversion file data in table complete for all Ont geographies with exception of Ott nbhoods – new GEN3 nbhoods in process and then to be incorporated into conversion file. OH Central nbhoods also in process to be incorporated into conv file. Final Conv file with Ott & OH Central aim is Apr/2023. Run test indicators. Decision: Not to post OCHPP Conv files on public website. As per request only.*
	✓ Peel Region Data Health Zones for reporting data – received and ready for use. Incorporate into OCHPP Ontario conversion file. See notes	*October 31, 2023: OCHPP will generate health data for OH Central regions which incorporate Peel region. Peel users can aggregate their own PHDZs using the OCHPP custom geography tool. To date, no data has been posted on OCHPP for PHDZs. In future, aggregation will be the way to view PHDZ data.* *February 7, 2023: Multiple versions of OCHPP conversion file completed and ready for use. Checking of populations. Internal use for now. Determine when we can post for External use including for Peel.*

OCHPP
Ontario Community
Health Profiles Partnership

A partnership designed to facilitate access to information for health planning
with the overall goal of producing action to reduce health inequalities.

		December 19, 2022: Conversion file is up-to-date with all Ontario geographies. Not posting conversion file with PHDZ until approval by Peel.
		February 7, 2023: Review of Ottawa nbhoods complete. Agreement to use the DA to SLI file for Ottawa. Population counts align with RPDB. Use new file for data for Ottawa.
		December 19, 2022: Big re-review of Ottawa neighbourhoods using SLI approach (PCCF -> DA-> Ott nbhoods). OCHPP uses PCCF+. OCHPP reviewed Ott file and provided feedback on where there were some issues with neighbourhoods. Ott hopes to use this new file (instead of the more complex "threshold" approach to reporting health data for neighbourhoods) for future health data cuts. Ott will inform OCHPP of their decision to use the new file.
		March 21, 2023: DM data by CT – generated. In review.
		February 7, 2023: Received letter from Peel. Submitted to ICES for PIA approval. Awaiting final approval from ICES for OCHPP to generate and post data for Peel.
		December 19, 2022: Asked Peel for a formal letter (instead of email) stating Peel is fine with OCHPP using PHDZs. Submit this formal letter to ICES for final PIA approval. Awaiting letter then will follow-up with ICES. Do not post PHDZ data on OCHPP until final approvals from ICES in place. OK to share the PHDZ diabetes data with Peel for special NovoNordisk project.
		November 7, 2022: Peel agreed we can use the current PHDZs as they are. Peel requested we share any health indicator data in advance before publishing on OCHPP (5 day review) to ensure they are aware of any "hot spots" the data may reveal in advance of publication.
	Ontario Health Teams (non-geographic based units of analysis) ✓ Work with Ontario Health Toronto to develop 1-2 equity analyses - NEW	*September 19, 2022:* *-Conversion file review in process. Added 39 PHDZs but will not post the PHDZs portion of the new conversion file to OCHPP until after one health indicator for PHDZs is done.* *-Use the conversion file to generate next health indicator for all geographies including Peel.* *- Include Ottawa neighbourhoods in next round of data once ONS provides OCHPP with permission to generate data in the method we proposed.* *-Discuss plan to start to include OHTs in analysis for OCHPP?* *July 20, 2022: Updated conversion file to include 39 Peel Health Data Zones in progress* *June 2022: Collaboration agreement between Peel Public Health & OCHPP finalized. PPH shared their Peel Health Data Zones (PHDZs) with OCHPP. Adding PHDZs to current OCHPP conversion file. Will eventually add 39 new PHDZs.* *June 2022: Data generated for Ottawa for MHEDV – checks taking place*
		May 23, 2023: Data for OHTs delayed due to attributed populations data not up-to-date. *March 21, 2023: OHT updates halted for now.* *February 7 2023: Updates to OHT page completed by OCHPP web developer.* *December 2021: New OHT page published on OCHPP in December 2021 with multiple OHTs and variables see link on OCHPP website here:* Notes: *-Ottawa Neighbourhoods: Fall 2021 posted Pap Smears – CRC on hold (see notes above in Prevention)* *-Ottawa Neigbhrouhoods: March 2022 – review of EDV Addiction-related & Non-Addiction-related – In progress – many small cells* *-Peel Region Data Zones: Received PHDZ file for OCHPP use by Peel Jan 2022.*
Miscellaneous and Related Projects	1. Work with new partners (Canadian Health Workforce Network & Mississauga/Trillium) to	**Projects in progress, coming soon, under review, in discussion with partners, future plans – misc notes:** *October 31, 2023:Conversion file Ver16b now complete and hopefully last version for a long while.*

	provide ongoing data 2. Work on OCHPP 25th anniversary to coincide with OCHPP partner meeting 3. Continue to work with ConnexOntario on data acquisition and mapping 4. Resolve health geography area reporting for OCHPP 5. Review CCHS variables to understand how to generate data requests using CCHS 6. Ontario Health Central: Small Areas Project 7.
