Developing Health System Planning Tools in the FLA OHT

Neighbourhood Mapping Community of Practice
Dec. 4th, 2025

Connor Kemp (PhD)
Population Health and Performance Lead
Suzanne Pashley (BAH)
Data Analyst

FLAOHT | ÉSOFLA

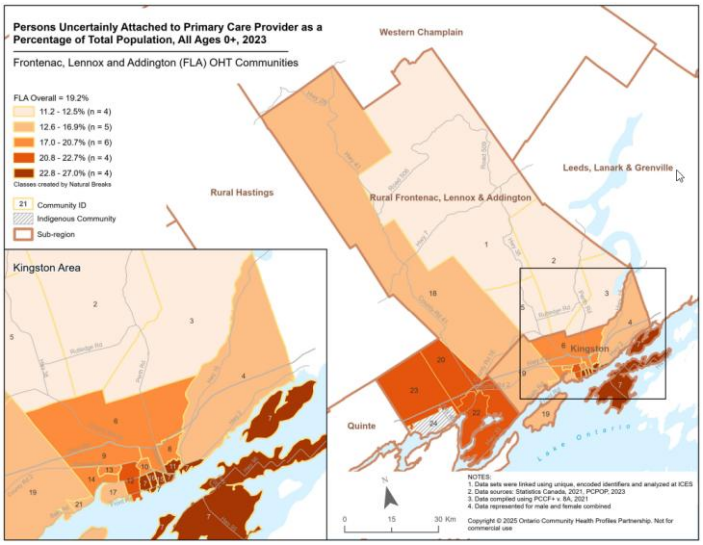

1

OCHPP Data - FLA OHT

Understanding the FLA region

Attachment
- Describe the need according to administrative databases
  - People unattached to primary care

Additional indicators
- Understand the health, wellness, demographics, SDoH, growth, etc. of the region

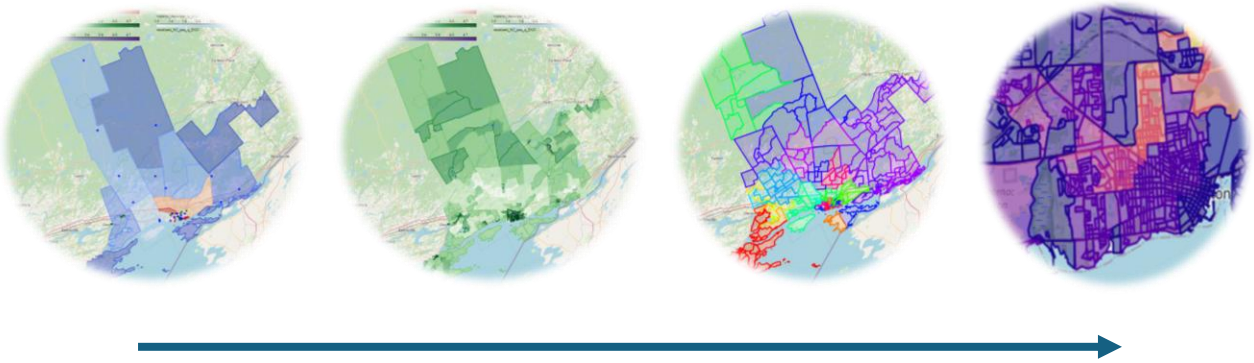

Data available at Ontario Community Health Profiles Partnerships OCHPP - FLA OHT

FLAOHT | ÉSOFLA

2

Building on the neighbourhood foundation
Macro-meso-micro-nano

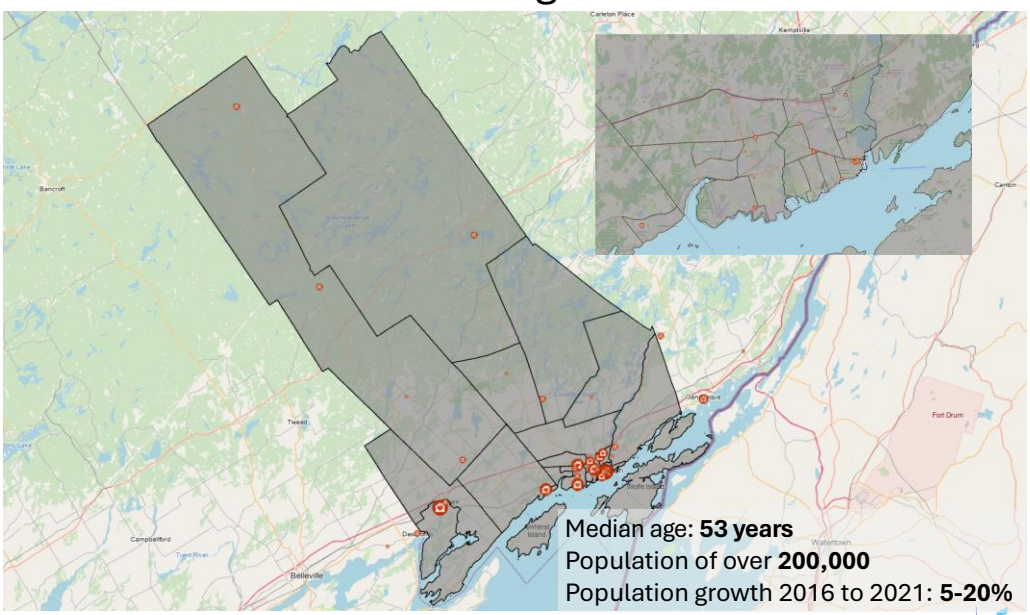

Attachment

Health equity, program/service delivery, broader community supports

Supply-demand and access (where people live)

3

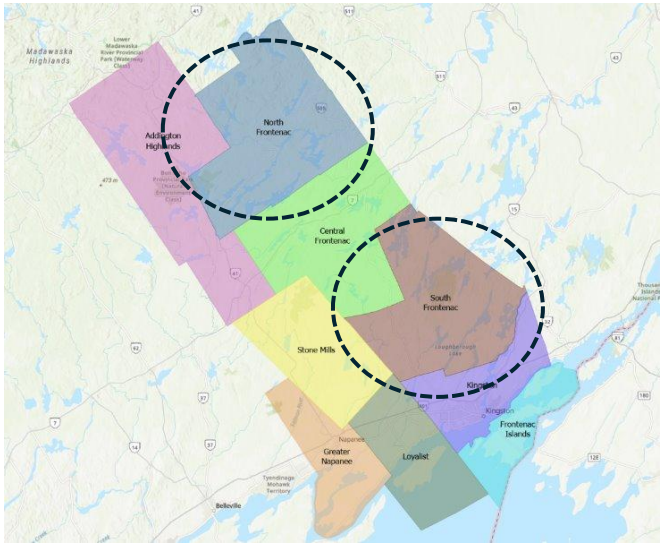

Macro: FLA at a glance

Median age: **53 years**
Population of over **200,000**
Population growth 2016 to 2021: **5-20%**

4

Meso: Understanding the population

CSDs: Recruitment and municipal alignment

	North Frontenac	South Frontenac
Median Age	62 years	49 years
French language	0.7 %	0.6 %
Median income (household)	$68,000	$104,000
Unattached	8.9 %	8.6%
Visible Minorities	2.7 %	1.8 %

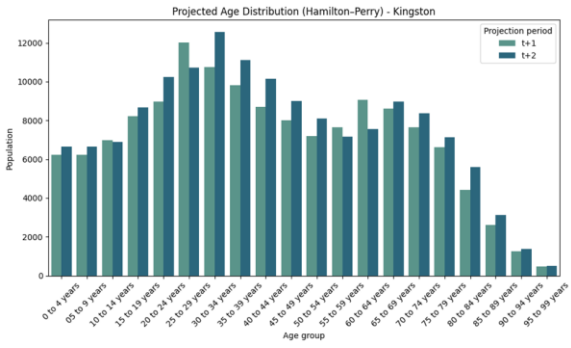

FLAOHT | ÉSOFLA

5

Meso: Understanding the population

Case example: North Frontenac and Kingston

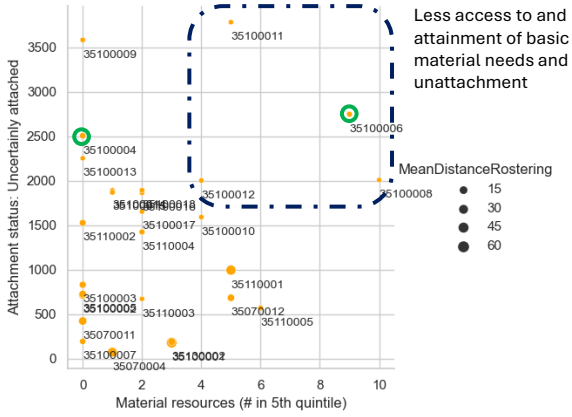

FLAOHT | ÉSOFLA

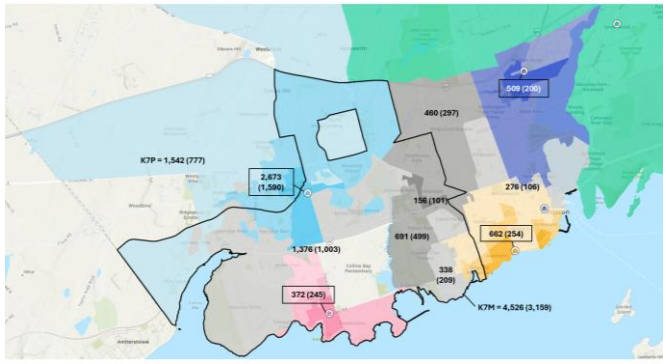

6

Micro: Material resources

Less access to and attainment of basic material needs and high unattachment

Increasing interdisciplinary team supports required

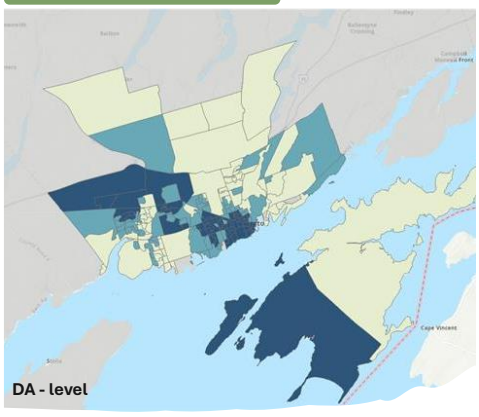

DAs: Distance and drive time

FLAOHT | ÉSOFLA

7

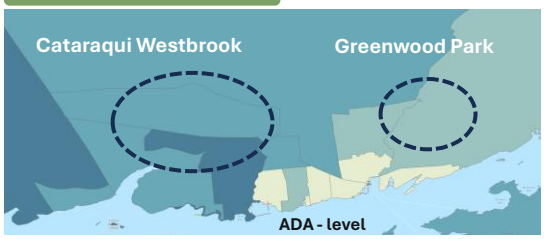

Micro: Social Determinants of Health

Visible minorities clusters

Consideration: Language and culturally appropriate care

Diabetes prevalence

Cataraqui Westbrook

- Average distance to food resource: **3.4 km**
- Average distance to nearest Health Home: **6 km**

Greenwood Park

- Average distance to food resource: **2.3 km**
- Average distance to nearest Health Home: **2.5 km**

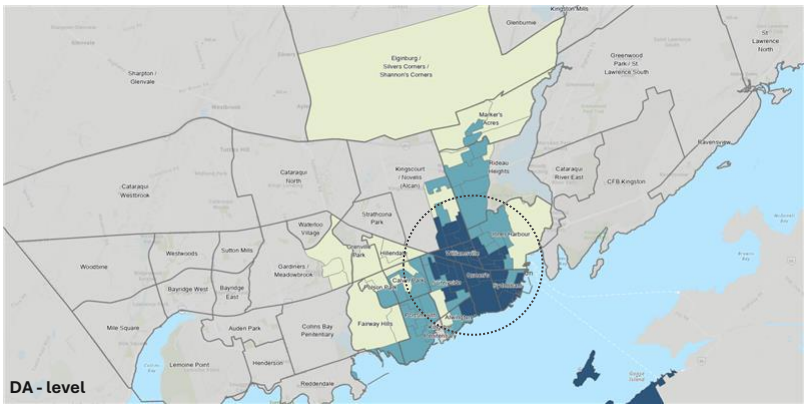

Consideration: Healthy eating -> food security

FLAOHT | ÉSOFLA

8

Micro to Nano: Cluster analysis

StatsCan Low-income after-tax indicator (LICO-AT score)

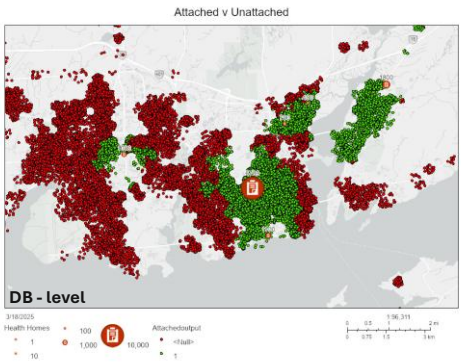

Area	Unattached rate (%)
City of Kingston	**15.6**
LICO-AT cluster	**19.5**

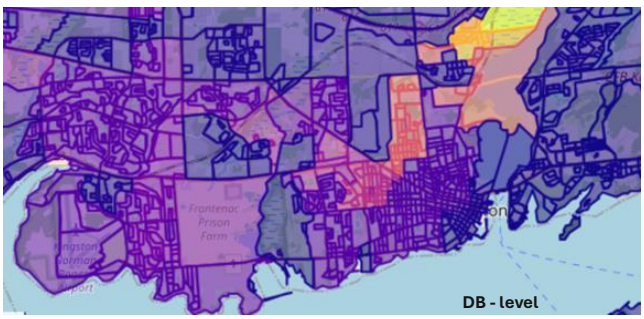

FLAOHT | ÉSOFLA

9

Nano: Supply-demand and dispersion

Population density and geographic dispersion

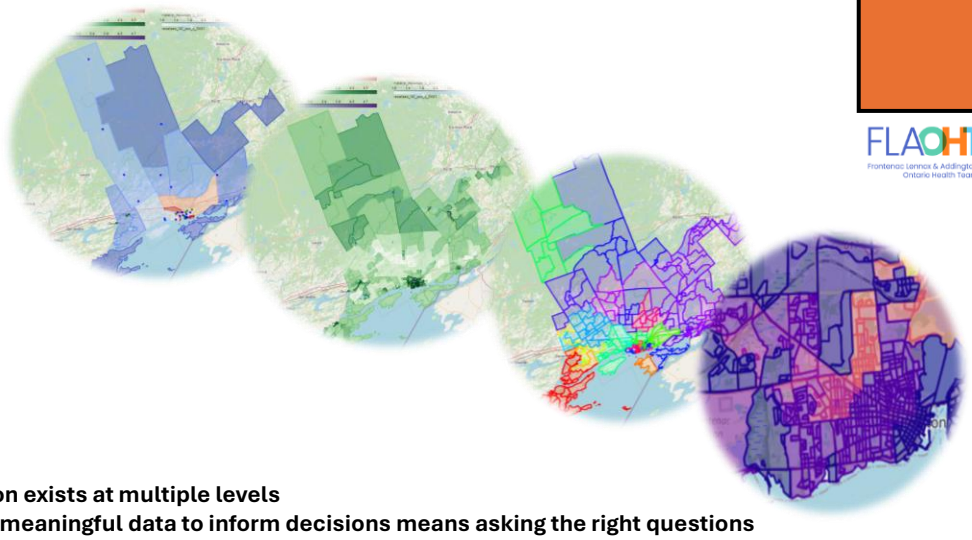

Increasing access to primary care services (modelled – unitless parameter)

FLAOHT | ÉSOFLA

10

Macro-meso-micro-nano

Information exists at multiple levels
Analyzing meaningful data to inform decisions means asking the right questions
